Soundtrack

From time to time, we like to explain how HBO works because every month many new subscribers join the ranks of viewers.

HBO presents movies unedited, uncensored—and uninterrupted by commercials, exactly as they were shown in theaters.

We schedule the same show a number of times each month, on different days, at

different hours—unlike the commercial networks that present a program once, then re-run it months or sometimes years later.

This way you are able to see movies and specials when you want to see them, not when network advertisers or local commercial stations offer sponsored programming.

HBO's convenient multi-

ple scheduling helps you plan your viewing, too. You don't have to miss a film you want to see just because you have something else to do one night—or because there's something on commercial TV you want to watch. Another plus to our kind of scheduling is that you can preview a show, if you wish, before turning it on for your family or friends.
